

Daniel Chimezie

Frontend Software Engineer | React, Next.js, TypeScript

dannydotdev@gmail.com | linkedin.com/in/Oxdaniel2 | github.com/OxDaniel | Oxdaniel.space

PROFESSIONAL SUMMARY

Frontend Software Engineer with 5+ years of experience building production web applications in React, TypeScript, and Next.js. Delivered measurable performance gains of 25 to 60 percent faster load times, shipped internationalized (i18n) products for European clients, and built pixel accurate interfaces from component style guides across marketplace, real estate, and fintech adjacent platforms. Experienced working with distributed, international teams to ship reliable, user focused products from concept to deployment.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js (SSR, App Router), Tailwind CSS, CSS3, Responsive Web Design

Mobile: React Native, Expo, Expo Router

Backend and Data: Node.js, Express.js, MongoDB, PostgreSQL, Supabase, REST APIs, Socket.io, Zustand

Testing and Quality: Jest, Cypress

Web3 and AI: Solidity, Web3.js, Ethers.js, OpenAI API, HuggingFace

Tools and Practices: Git, CI/CD, Vercel, Railway, Internationalization (i18n), Component Based Architecture, Agile/Scrum, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer

September 2026

Difinda, Contract, Remote

- Built the frontend for Difinda (difinda.ng), a real estate platform connecting University of Benin (UNIBEN) students with verified agents and apartment listings.
- Delivered property listing, search, and agent verification flows over a focused 4 week engagement. The platform has helped 20+ students secure apartments since launch.

React Native Developer

April 2026 - June 2026

Vauchly (Hiring and Freelance Marketplace App), Contract, Remote

- Built the frontend for an Africa first, map based hiring platform, now at 20K+ active users, using React Native (Expo), Expo Router, and Zustand, standardizing UI across 100+ files for pixel accurate consistency.
- Engineered real time chat functionality with Socket.io, including a singleton connection pattern, rich in chat transaction cards, and role based action controls.
- Integrated REST APIs across wallet, KYC, and proposal workflows, including a multi step KYC verification flow with document validation.

Web Developer, Part-Time Contractor

January 2026 - August 2026

Fjord (Web Development Agency), Sweden, Remote

- Built and maintained production websites as a contractor for a Sweden based development agency, delivering responsive client sites using React, TypeScript, and Next.js.
- Implemented internationalization (i18n) with next-i18next and next-intl, shipping live English and Swedish localized versions of a client site.
- Owned ongoing feature development, bug fixes, and performance optimization across live client projects, ensuring consistent uptime and code quality.
- Collaborated directly with international clients and agency stakeholders across 5 client contracts, scoping, estimating, and shipping projects on schedule.

Mobile Application Developer

May 2025 - August 2025

Yefa Daily (Productivity Mobile App), Freelance, Remote

- Led full stack development of Yefa Daily, a productivity app for career and personal growth, from concept through App Store and Google Play release, using React Native for mobile and Go for the backend.
- Drove early adoption post launch, reaching 500+ downloads across Android and iOS.
- Implemented progress tracking systems and engagement features to drive user retention post launch.

Full-Stack Mobile App Developer

January 2025 - March 2025

ThermoTrap (Form Builder Mobile App), Saudi Arabia, Remote

- Built a drag and drop form builder using React Native and PostgreSQL, enabling dynamic form creation and validation for non technical users.
- Optimized SQL queries and implemented pagination, reducing dashboard load time by 60%.

Software Engineering Instructor

November 2024 - February 2025

ISIDSEP Web Development Program (World Bank Sponsored), Kaduna, Nigeria

- Led front end engineering training for 200+ students, designing a project based curriculum covering HTML, CSS, JavaScript, and Git.
- Personally mentored 70+ students through code reviews and technical Q&A sessions, improving comprehension and completion outcomes.

Frontend Web Developer

May 2023 - May 2024

Propout (Real Estate Platform), Abuja, Nigeria, Remote

- Built property listing, search, and user dashboard pages using Next.js, implementing SSR and lazy loading, cutting page load speed by 25% and API wait time by 40%.
- Achieved 100 Lighthouse scores across Performance, Accessibility, and Best Practices through optimized rendering and semantic markup.
- Developed booking and inquiry forms in collaboration with designers, translating mockups into pixel accurate UI, increasing user engagement by 20%.

Frontend Web Developer

September 2022 - April 2023

Lumanagi, Contract, Remote

- Built a full stack crypto prediction platform using React.js and Solidity, featuring real time bet placements and automated smart contract rewards.
- Designed and deployed a responsive UI with Tailwind CSS, reducing mobile bounce rate by 35%, measured via analytics after shipping.
- Integrated Jest and Cypress test pipelines, increasing test coverage by 30%.

Founder, Freelance Web Developer

May 2022 - November 2024

Aestrix Devs, Abuja, Nigeria

- Founded a web development agency delivering custom websites and web applications for small businesses and startups, from design through deployment.
- Managed client relationships end to end, including scoping, pricing, timelines, and post launch support across multiple concurrent projects.

Frontend Developer

February 2021 - October 2022

Mannai TechHub, On-site

- Mentored students in responsive layout techniques and modern JavaScript, conducting code reviews across multiple cohort projects.
- Introduced frontend best practices, improving code quality and consistency across student projects.

PROJECTS

GMapLeads

Telegram Bot, Next.js, TypeScript, Node.js, Telegram Bot API

- Built a lead generation platform that scans Google Maps for businesses without websites and delivers qualified leads directly to Telegram in real time.
- Grown to 13K+ active users on free and premium plans.

Idea Spark

TypeScript, React.js, Tailwind CSS, AI/LLMs

- Built an AI startup idea validator generating a full analysis from a single input: elevator pitch, taglines, personas, and market validation.
- Designed a 1 to 100 idea scoring system visualized with an accessible radar chart, achieving a 100 Lighthouse accessibility score.

Keep Awake

Node.js, TypeScript, CLI

- Built and published an open source npm CLI tool that pings hosted apps on Replit, Glitch, and Cyclic every 5 minutes to prevent free tier platforms from idling.
- Backed by full technical documentation covering installation, configuration, and usage.

EDUCATION

Federal Co-operative College, Kaduna

November 2019 - September 2023

National Diploma, Business Administration and Management, CGPA: 3.87/4.00, Kaduna, Nigeria

National Open University of Nigeria (NOUN)

In Progress, Expected 2029

B.Sc., Business Administration, Online

Khemsafe Computers, Fullstack Web3 Development

2022

Udemy, Fullstack Web Development

2022
